Serv(e)Go

zigbee

Simplify after-sales service

What is Serv-e-Go®?

Serv-e-Go® is a web application designed for dealers to elevate their after-sales support by remotely diagnosing errors and providing real-time support to their end users enjoying Zigbee installations.

How does it help you?

Diagnose

Remotely view TaHoma® switch installations, customer information, device status, alerts, and more.

Support

Modify settings and provide corrective tips to end users without visiting the site.

Go equipped

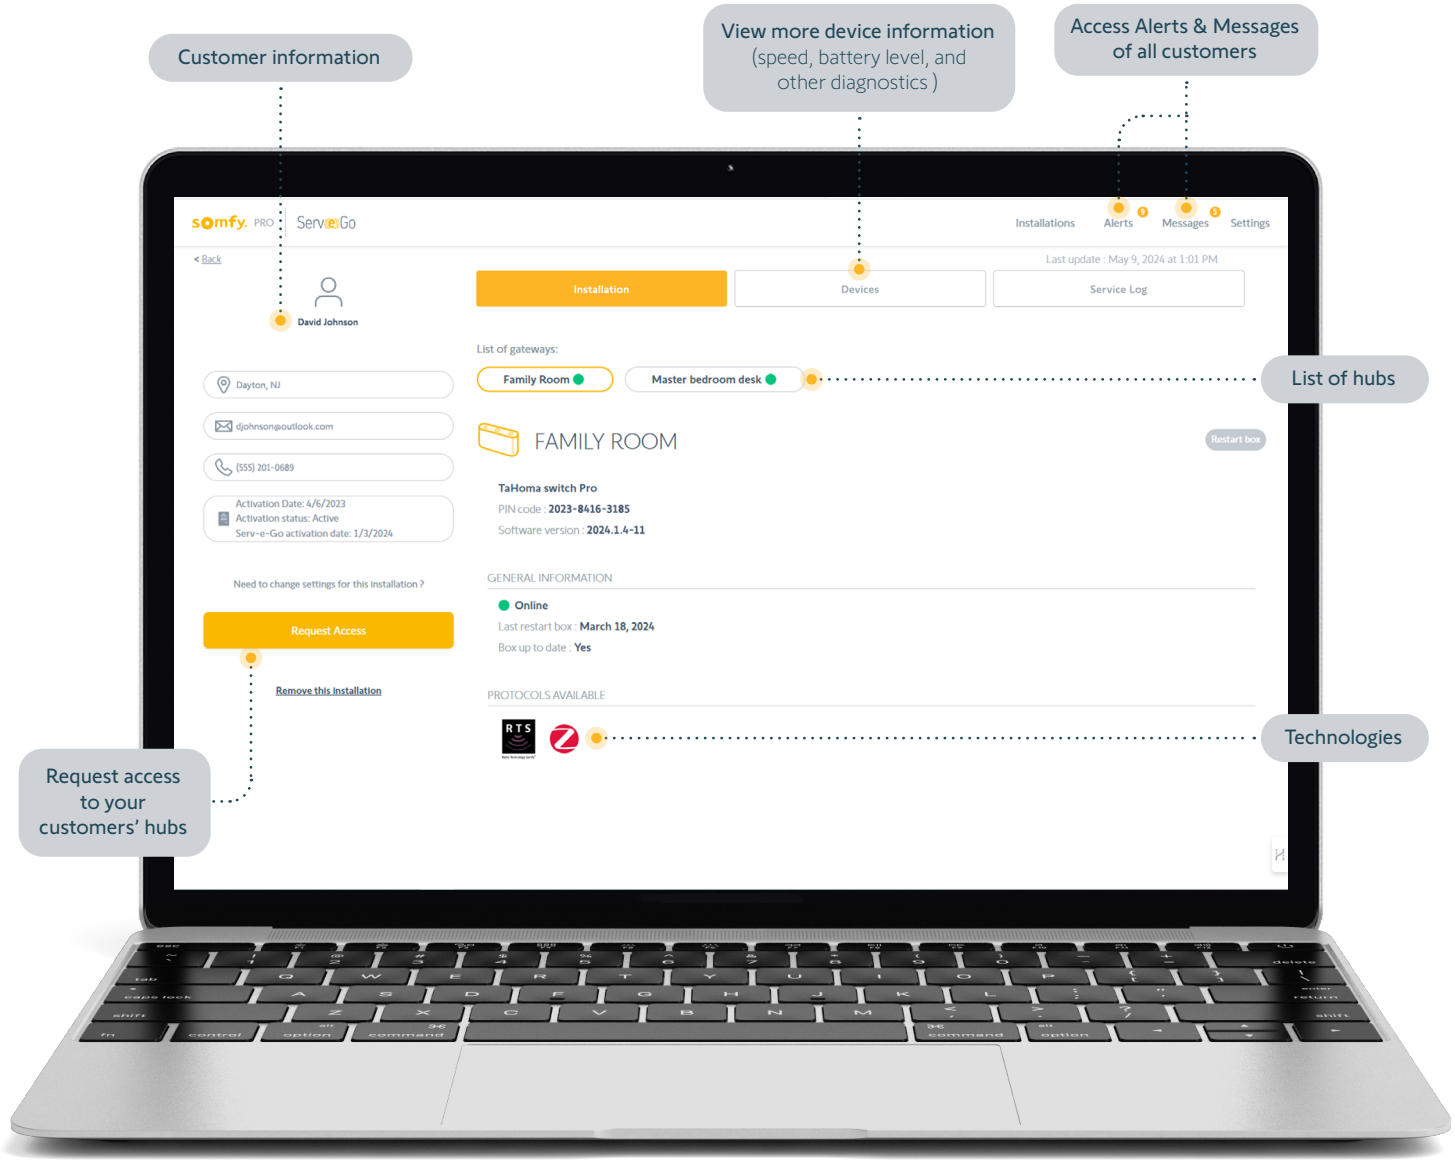

Efficiently arrive on-site understanding the problem, the product, and with appropriate tools on-hand.

The smart home coordinator that makes it all possible
