Take a massive leap forward comfortably

An ecosystem of smart shading products designed to simplify your customers' lives

somfy®

Introducing

our new comfort-driven ecosystem, built for everyone

Some would say our business is motorization and automation. We would say it's comfort. Ever since we pioneered the industry over 50 years ago, the goal was to give people added convenience in their lives. But to be truly comfort-driven, we must extend this mission even further.

Comfort is ease on the production floor, building automated window coverings without slowing your manufacturing and productivity.

Comfort is confidence that every installation will be done in less time, and done right the first time.

Comfort is peace of mind that your smart shades, blinds, or draperies will work seamlessly with any future change in smart home tech.

With **Somfy Smart Shading** now on Zigbee® 3.0, comfort is the name of the game — from manufacturer to installer to end user.

Somfy means comfort.

New
and streamlined

Meet our smart shading ecosystem featuring Zigbee 3.0 technology:

Somfy motors
fitting nearly any interior style of shades, blinds, or draperies.

TaHoma® pro app
simpler fabrication, motor setting, and installation.

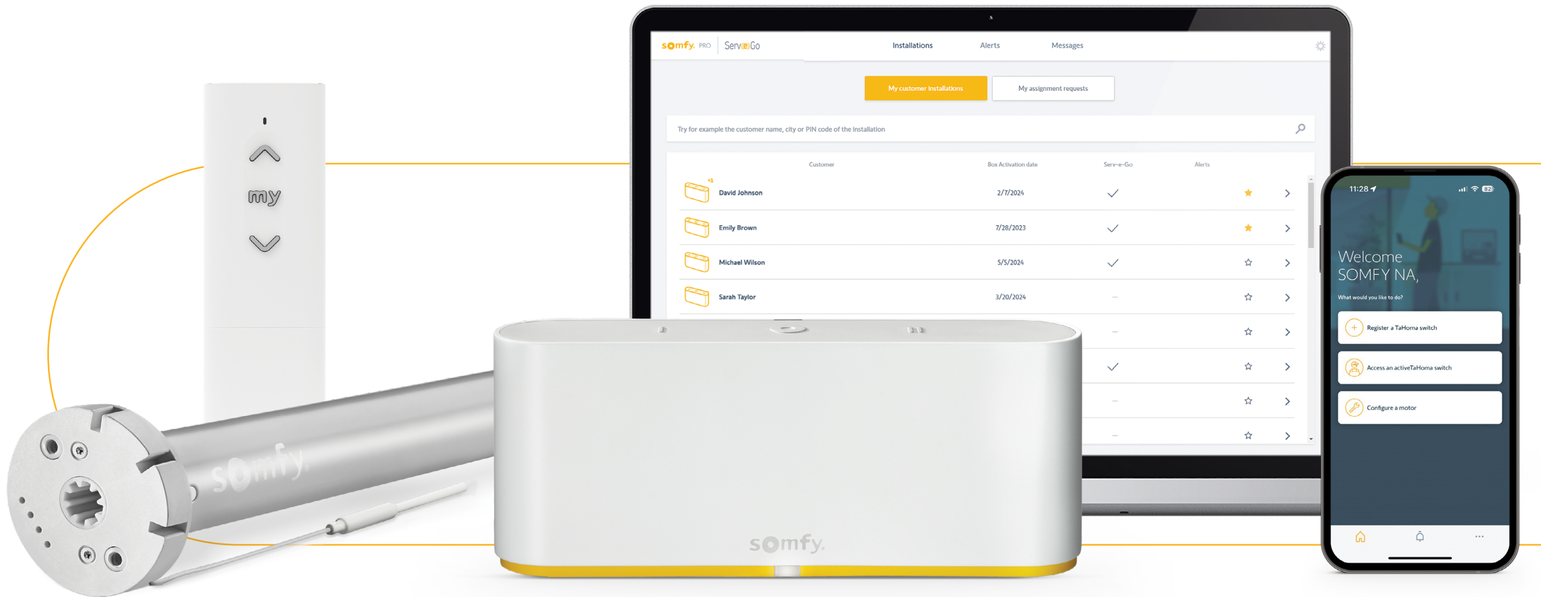

TaHoma® switch
smart hub for a solid, reliable network.

TaHoma® by Somfy app
giving homeowners the ability to connect, control, and customize.

Ysia remote
direct control of window coverings at the touch of a button.

Serv-e-Go®
a web app for dealers to elevate after-sales support.

Somfy makes smart things

connected, adaptive, and secure

Our latest state-of-the-art motors run on Zigbee, an open standard for communication and connectivity in the home. Zigbee gives our motors greater functionality and ensures that your products will integrate seamlessly.

Simple, secure connection for increased uptime

In addition to our Zigbee technology, our motors also feature Bluetooth which allows for a direct link to each motor to help avoid device crosstalk, cut down on production time, and avoid delays in your workflow.

End-to-end reliability for your bottom line

From motor pairing in production to seamless integration, Somfy keeps you moving smoothly with the most forward-looking tech to be ready and open to new smart home innovations.

Bi-directional communication for user comfort

Help your customers feel in control of their space with real-time status of all their window coverings and precise controls for their preferred position.

Moving smoothly

to the factory floor

Window coverings aren't the only thing we keep moving. We've streamlined the entire motor setting process for fabricators, letting you configure everything through our new mobile app.

Simple
Each motor has a QR code that can be scanned for a one-to-one connection with no crosstalk slowing down a production line.

Intuitive
With a step-by-step process to configure motor settings and set end limits, you'll save time training new and current production staff.

Self-Contained
With the entire configuration set from the app, you'll avoid the complicated button sequence that requires memorizing or referring to extensive setup documentation.

The TaHoma pro app is a revolution in building smart window coverings.

SCAN ME

Our people mean peace of mind

Somfy is there for you every step of the way.
Our sales and support teams are ready to help you achieve your goals and make the move forward.

Mobile screens are for illustrative purposes only.

As easy as...

We've turned setup into an "oh, that's easy" process with the TaHoma pro app

Every step to configure the motor is done via Bluetooth with the app. There's no need for an internet connection.

Keeping it simple keeps you in motion.

PRO

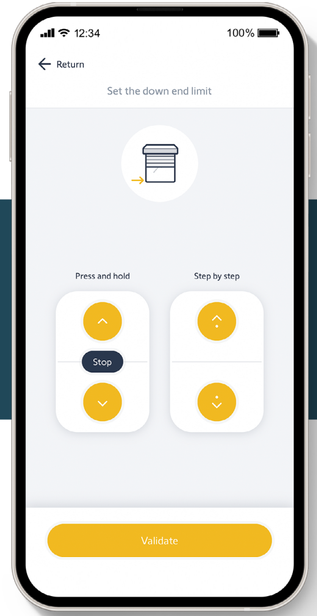

1.

Scan the QR code on the motor to establish a direct connection.

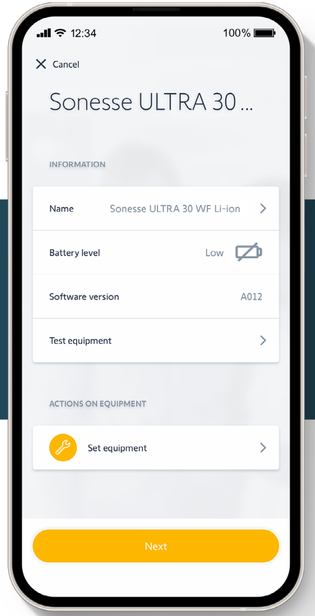

2.

Set the upper and lower limits, rotation direction, and rotation speed*.

3.

Name the motor, check the battery level*, and set it to delivery mode.

Where applicable. Mobile screens are for illustrative purposes only.

Streamlined for dealers

Our tools make installation hassle-free

The TaHoma pro app is built for both manufacturers and dealers. For dealers, the app makes it much easier and less time-consuming to set up the network and customize the operation.

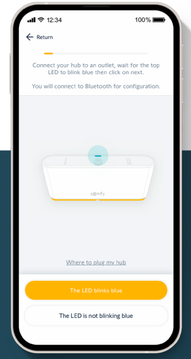

Pro tools make it easy for dealers to sell, install, and service.

PRO

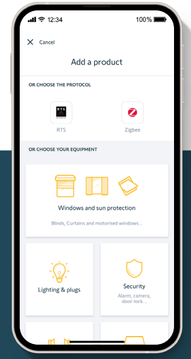

Scan a QR code for a direct connection to change individual blind settings in a snap.

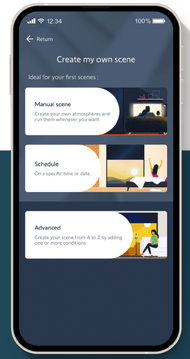

Register and set up the TaHoma switch with or without an internet connection.

Add devices that include shades, remotes and smart plugs.

Create scenes and schedules to suit your clients' needs.

Serv(e)Go **simplifies after-sales service on your PC**

An all-in-one remote monitoring and troubleshooting tool for the Somfy Zigbee ecosystem. Dealers can keep track of all connected installations, diagnose issues, and provide remote service to clients easier than ever! No need for in-person service requests that can cost valuable time.

Access **Serv-e-Go** from your SomfyPro account

TaHoma switch

The central hub that connects and controls the smart home ecosystem — powering the TaHoma by Somfy app for homeowners and giving them complete control, no matter their preferred smart home ecosystem.

TaHoma by Somfy app

A single interface that connects the homeowner to their smart home, giving them full control over their window coverings and lighting — with real-time status views of every motor.

Somfy motors

Every motor — wired or wireless — offers precise positioning adjustments and easily configured settings directly from the TaHoma by Somfy app.

**Apple Home compatibility is only supported for TaHoma switch used with select Zigbee technology motors. See motor specifications for details.*

Make the move

About Somfy®

For over 50 years, Somfy has been pioneering innovative motorization and automated solutions for window coverings and exterior shading products. With comfort, ease of use, security, and sustainability in mind, our seamless and connected solutions are designed to help people make the move to living spaces impactful for humans and with a reduced impact on nature.
